

MONDAY JEFFREY ENTERTAINMENT

# WAR GAME

*An Infinite Hex Conflict*

★ INSTRUCTION MANUAL ★

For Monday Jeffrey <sup>TM</sup> · Player 1

MJV-0001 · v1.1 · PRINTED IN AUSTRALIA

The world is infinite. Drag the map in any direction and new lands unfold — rolling plains, jagged mountains, still lakes, and the deep blue boundary of the open sea. Three rival warlords share this realm with you, each carving an empire out of unclaimed neutral ground. Only one of you will rule what remains.

### THE FOUR WARLORDS

---

#### **YOU · The Player**

Strategy is yours. You begin with a seven-hex capital and four units of cavalry on each tile. From this small kingdom you must do what your enemies cannot — choose.

#### **CRIMSON · The Expansionist**

Sprawls in every direction. Acts every 1.8 seconds, up to three moves at once, and will throw a stack at any target it can plausibly win. Crimson is everywhere — and thinnest where you need to look.

#### **VERDANT · The Balanced**

Methodical and patient. Acts once every 3.5 seconds. Prefers stable borders and quietly accumulates strength. Outpaces nothing but outlasts almost everything.

#### **VIOLET · The Strategist**

Tactical, fast, and frightening. Acts every 1.4 seconds — but only attacks when victory is certain. Stops at fourteen hexes and turtles behind mountains and shorelines. Do not let her finish her wall.

### **VICTORY · DEFEAT**

*Capture the crowned hex at the centre of an enemy capital to eliminate them. Lose yours, and you fall.*

## CONTROLS

---

|                            |                                        |
|----------------------------|----------------------------------------|
| <b>Click your hex</b>      | Select a source                        |
| <b>Click any other hex</b> | Dispatch a march (up to 30 hexes away) |
| <b>Drag the map</b>        | Pan the view                           |
| <b>Mouse wheel / pinch</b> | Zoom in and out                        |
| <b>+ / -</b>               | Zoom by keystroke                      |
| <b>B</b>                   | Toggle road build mode                 |
| <b>F</b>                   | Toggle fog of war                      |
| <b>P / Space</b>           | Pause (30 s, 5 min cooldown)           |
| <b>Esc</b>                 | Clear selection or exit build mode     |

## MARCHES

---

Selecting your hex and then clicking a destination dispatches half your troops along the shortest path through known passable land. When the column enters an enemy or neutral hex it gives battle. If it prevails it leaves a single garrison troop and presses on with the survivors. If it falls, the defenders gain that ground.

Movement is timed. A march steps once every 2.2 seconds across plains and once every 5.7 seconds through mountain country. Where you have built roads on both ends of a step the time drops to around 0.9 seconds.

Water always blocks.

## BUILDING

---

|                 |                |                                          |
|-----------------|----------------|------------------------------------------|
| <b>Road</b>     | <b>6 gold</b>  | Cuts march time across your network.     |
| <b>Farm</b>     | <b>10 gold</b> | +50% troop production on this hex.       |
| <b>Fortress</b> | <b>15 gold</b> | +50% defender strength on this hex.      |
| <b>Tower</b>    | <b>8 gold</b>  | +2 hex vision range when fog is enabled. |

## TERRAIN

---

- Plains · +1 troop per tick, normal march speed.
- Mountains · +1 every 5 ticks, 2.6× slower, +35% defender.
- Lakes & Oceans · impassable. Use them as natural walls.

## DEVELOPMENT (LEVELS 1 – 10)

---

- A held hex levels up roughly every 30 seconds.
- Level 10 produces five times what a Level 1 hex does.
- Captured hexes reset to Level 1 and lose any improvement.

## CAPITALS & GOLD

---

- A capital is a seven-hex cluster with a crowned centre.
- Capital hexes earn +1 production and defend at +50%.
- Roughly one in twenty-eight passable hexes is a gold mine.
- Owning a mine earns gold per tick — spend it on improvements.

## UPKEEP & FOG

---

- Armies above an average of 25 troops per hex begin to drain.
- Each 10 troops of excess costs 1 troop per tick.
- With Fog of War on, only your vision is yours to plan in.
- Towers extend sight; capitals see two hexes in every direction.

### ★ TIPS FROM AN OLD GENERAL

*“Crimson will overextend — pick his frontier hexes off one by one. He won't notice the holes until it's too late.”*

*“Violet is dangerous only if you let her settle. Strike before she finishes her fortress.”*

*“One Level 10 hex out-produces a sprawl of Level 1 land.”*

*“When in doubt, build a road.”*
